### Contour™ LSO

- The brace is effective and comfortable, using the QuikDraw™ with Rigid Anterior Panel (RAP) as the platform
- The Contour™ LSO is modular with adjustable side and vertical panels, allowing the practitioner to fit a wide variety of patients while minimizing inventory
- Specifically designed with the progression of patient care in mind, the Contour™ LSO is a multiple orthotic system, which can be stepped down to the proven QuikDraw™ RAP

### Aspen LSO Low Profile

- When tightened using the LeverLatch mechanism, the brace firmly and evenly compresses the torso
- Enables patients to regain a significant degree of functional mobility
- The unique three-piece design, featuring symmetrical side panels, allows the practitioner to configure the orthosis so it can be tightened using either hand

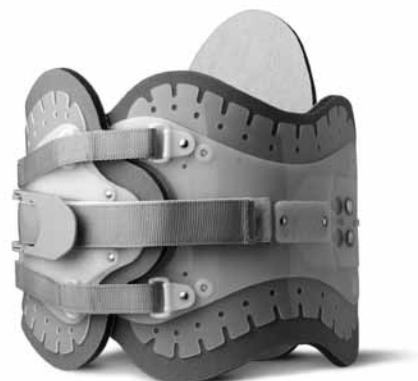

Size	Back Panel Height	Waist Circum.	Product No.	Replacement Pads

### Aspen LSO High Profile

- Provides motion restriction equivalent to that of the leading custom orthoses; forms a structurally rigid polyethylene cylinder that captures the trunk in a highly effective manner
- When tightened using the LeverLatch mechanism, the brace firmly and evenly compresses the torso
- Large lumbar window offers unobstructed vision and physical access for better patient care
- Provides maximum airflow for improved comfort

### Bauerfeind® - LumboPlus® Back Brace

- The LPT strap system (Low Power Tension) permits the application of considerable force against the body
- Skin-friendly, breathable, lightweight materials that provide circumferential support
- Practical finger pockets mean that the support can be fitted easily without the need to expend considerable effort
- Anatomically contoured abdominal pad provides improved abdominal cavity compression

**Indications:** Osteoporosis; Spondylolisthesis; Degenerative instabilities; Postoperative lumbar stabilization

### Becker Orthopedic - Model 106 Knight LSO

- Controls lumbosacral flexion/extension, and lateral flexion
- Consists of two paraspinal bars and two lateral uprights attached inferiorly to a pelvic band and superiorly to a thoracic band
- Posteriorly, the inferior edge of the pelvic band is situated at the sacrococcygeal junctions for maximum leverage
- Abdominal support is secured to lateral uprights with corset lacing

### Model 108 Williams LSO

- Controls lumbosacral extension and lateral flexion
- Model 108 consists of pelvic and thoracic bands
- Two lateral uprights pivot on the thoracic band, but are not attached to the pelvic band
- The pelvic band is stabilized by a pair of oblique bars attached to the pelvic band and pivot on the lateral bars
- The abdominal support is laced to the lateral bars

### Bledsoe Brace - Volare LS

- Anterior and posterior panels to unload spinal pressure for pain relief
- Zip line that provides a 5:1 mechanical advantage for easy one hand adjustment
- Posterior panel that extends from the L-1 to below the S-1 vertebra

**Indications:** Multiple level decompression; Lumbar laminectomy; Posterior lateral fusion and mechanical back pain

### Volare LS-xt

- Anterior/posterior panels to unload spinal pressure for pain relief
- Zip line that provides a 5:1 mechanical advantage for easy one hand adjustment
- Posterior panel that extends from sacrococcygeal junction to T-9 vertebra

**Indications:** Thoracolumbar injury; Revision surgery; Multi-level fusion; Mechanical Back Pain; Disc Herniation; Disc Degeneration; Lumbar Disectomy

### Breg - BOA Back Brace with Chairback

- Lightweight, latex-free modular construction is designed to support a three-stage treatment protocol
- Stage 1: involves post-operative use of the BOA with the rigid chairback piece, the flexible compression belt, and rigid anterior panel
- Stage 2: involves the removal of the chairback piece for compressive support during a progressive rehabilitation protocol
- Stage 3: involves removing the rigid anterior panel

**Indications:** Low back pain; low back sprains/strains; lumbar disc injury; Osteoporosis; Disc herniation and degeneration; Postoperative discectomy; IDET procedure; Spondylolithesis; Postoperative fusion; Spinal stenosis

### BOA Classic 8" Back Brace

- Comprised of comfortable Airmesh® material, a flexible compression belt and a removable, moldable anterior panel; latex free
- Lacer Compression System utilizes a multiple teardrop channel design, high-tension cords and a single-pull strap to apply circumferential compression
- Midline opening eases pressure over the incision site, allowing for wound inspection without removing the orthosis
- Optional orthotic insert provides additional support and comfort while preventing slippage

**Indications:** Low back pain; Low back sprains/strains; Lumbar disc injury; Osteoporosis; Disc herniation and degeneration; Postoperative discectomy; IDET procedure; Spondylololthesis

### Comprehensive LSO

- Patented Mechanical Advantage Pulley System
- Interactive patient controlled lumbar and compression conformity
- Ergonomic covered plastic anterior panel
- Removable plush padding on both anterior and posterior panels

**Indications:** Lumbar mechanical back pain; Spinal stenosis; Spondylolisthesis; Facet Syndrome; Trauma; Pre- and Post-operative stabilization; Management protocol following Laminotomy; Foraminotomy; IDET procedures; Anterior Laprscopic fusion; Multilevel decompression

### Prolign® Pro Lumbar Orthosis

- Dual, dynamic closure system provides infinite adjustment and maximum compression
- Rigid anterior insert provides support to the intra-abdominal and viscera region helping to unload the spine under gravitational load
- Posterior plastic insert (spot moldable) helps to maintain neutral sagittal alignment while maximizing support of abdominal structures
- Plastic D-rings for ease of application and removal

**Indications:** Post-operative lumbar immobilization; Chronic low back pain; Lumbar muscle weakness; Lumbar strains and sprains; Mechanical or discogenic disc disease; Postural support; Degenerative disc disease; IDET procedure; Spinal blocks

### DonJoy (DJO) - Back Bracing

- Simple hook and loop closure for ease of application and removal
- Proprietary Mechanical Pulley System panels allow for a smooth and uniform compression
- Breathable interior spacer fabric with outer mesh allows heat to escape without compromising brace performance
- DonJoy Lite is a lighter version of the Low Profile, without the rigid anterior panel, providing support for mild lower back pain, from L1-L5

**Indications:** Low back pain; Low back sprains/strains; Lumbar disc displacement; Osteoporosis; Disc herniation and degeneration; Post-operative laminectomy; Post-operative disectomy; IDET procedure; Spondylolisthesis; Post-operative fusion; Spinal stenosis

### VertaMax™ LSO

- Provides anterior-posterior support, abdominal support, anatomic fit, ease of donning and doffing and soft comfort
- Abdominal compression can be increased or decreased with the fastening tabs
- Adjustable anterior and posterior plastic panels contour and conform to patients of shapes, sizes and lordotic curves with no heat molding necessary

**Indications:** Degenerative, herniated or bulging disc; Spondylolysis; Spondylolisthesis; Spinal stenosis; Facet syndrome; Tumors; Inflammation; Chronic back pain; Spinal instability; Lumbago

### Orthomerica - Ventura™ Spinal Brace

- Easy to fit and simple for the patient to don and doff
- Provides controlled levels of stability by featuring easily removable rigid plastic components

**Indications:** Post-operative laproscopic disk replacement; Post-operative IDET procedures; Post-operative lumbar laminectomy; Post-operative spinal fusion; Chronic low back pain; Mechanical back pain with activities of daily living; When spinal control of extension and flexion is desired/required

### California® Compression/Compressor Orthosis

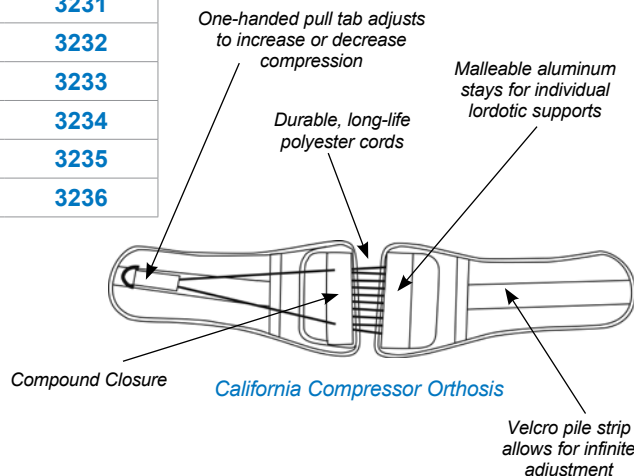

- Low profile lumbar orthosis that provides maximum abdominal support with easy one-handed compression pull tab
- Breathable, comfortable mesh fabric minimizes heat build-up
- Lightweight for patients requiring support for everyday activities such as lifting, long periods of standing, work related motions, golf and gardening

**Indications:** Acute and chronic low back pain; Spondylolisthesis; Post-op low lumbar laminectomy

California Compressor Orthosis

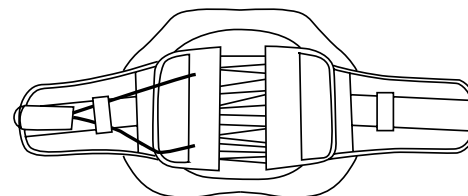

### California Low Profile Orthosis

- Modular spinal system that provides stability without compromising respiration or interfering with activities of daily living
- Compound closure system is adjustable for both circumference and waist/hip development
- Low Profile LC is the lightweight and economical version of the Low Profile

**Indications:** Acute and chronic low back pain; Post-operative support; Activity-related low back pain; Patients that have problems tolerating xyphoid spinal systems

### California Mid-Profile Orthosis

- Compound closure system provides patient-regulated compression to supplement abdominal musculature
- Coolfoam™ liner provides a comfortable patient interface
- Thermoplastic posterior component extends to T9 and provides total contact over the paraspinal muscles
- Anterior panel includes a pocket with an internal thermoplastic shell to provide abdominal support and control motion
- Thermoplastic components can be removed during the rehabilitation phase so the patient can strengthen abdominal and back muscles within a safe range of motion

**Indications:** Post-operative laproscopic disk replacement; Post-operative IDET procedures; Post-lumbar laminectomy; Post-operative spinal fusion; Chronic low back pain; Mechanical back pain with activities of daily living; When spinal control of extension and flexion is desired/required

### California® CPO Orthosis - Chairback Mid-Profile Orthosis

- Posterior Chairback shell limits lower thoracic and lumbar spinal extension while providing a foundation for the compound closure system
- Xyphoid-height mid-profile anterior panel allows limited forward flexion - an acceptable motion particularly in some anterior spine procedures
- Compound closure is simple for patients to don and doff
- Orthosis can be transformed into an LS Orthopedic grade corset by removing rigid components

**Indications:** Stabilization following laminectomy; Anterior laproscopic fusion; Single or multiple level posterior spinal fusion; IDET procedures; Disc replacement; Spondylolisthesis; Spinal stenosis; Trauma; Chronic low back pain; Activity-specific back pain

### California® Chairback Orthosis

- Designed for comfort and stability using a compound closure system
- Comfortable and CoolFoam™ liner
- Posterior opening eases pressure over incision sites, provides ventilation, and allows wound inspection without removal
- Internal plastic panels provide anterior rigidity and help block forward flexion while the chairback portion discourages lateral flexion and excessive extension

**Indications:** Post-operative laminectomy; fusion; IDET procedure; Chronic low back pain; Arthritic conditions; Spinal metastasis; Occupational protection

### Ossur Americas - Miami Lumbar™

- Belt and its various support panels are sculpted to hug the contours of the back, providing comfort, stabilization and compliance
- Breathable Aerospacer fabric and ventilated support panels combine to keep Miami Lumbar cool and comfortable to wear for extended periods of time
- Trimmable belt combines with heat-moldable anterior and posterior panels to create a customizable, modular system
- Relieves pressure over the spinous processes while applying an even pressure to the paraspinal musculature to ensure comfortable and effective healing
- Four-to-one ratio drawstring and easy to use pulley system makes it simple to tighten, even for arthritic and/or geriatric patients

**Indications: Miami Lumbar Belt:** Spinal stenosis; Herniated discs; Degenerative spinal pathologies; **With added rigid panels:** Post-surgical stabilization; Stable, non-displaced spinal fractures (L2-L5); Spinal stenosis; Herniated discs; Degenerative spinal pathologies; Spondylolithesis; Spondylolysis

### RCAI - LSO

- Provides circumferential pressure to stabilize the spine
- Uses modular systems featuring thermoplastic Kydex® anterior and posterior panels, with polymer stays in lateral pockets
- Back panels have a surgical opening to relieve pressure at the incision site
- Breathable liners are made of a “wickable” material that keeps moisture away from the skin, promoting patient comfort and compliance

**Indications:** Lumbar fusion laminectomy; Compression fracture; Degenerative disc disease; Spondylolisthesis; Spinal stenosis; Osteoporosis

### Aspen TLSO

- Multiple orthotic options that provide a high degree of immobilization, comfort, and the ability to self-adjust patients
- VectorPoint™ Chest panel adjusts to the height and profile of each patient; this padded chest panel anchors the front and back of the brace to an anterior vector point in the upper thoracic region
- Optional torso control straps further limit flexion and rotation by linking the padded chest panel to a second location on the back of the brace

### Becker Orthopedic - Model 101 Knight-Taylor TLSO

- Controls thoracolumbar flexion, thoracolumbar extension and lateral flexion
- Model 101 consists of two paraspinal bars and two lateral uprights attached superiorly to a thoracic band and inferiorly to a pelvic band
- The paraspinal bars extend superiorly and are attached to a interscapular band which serves as an attachment site for the auxiliary straps
- Abdominal support is secured to the lateral uprights with corset lacing

### Breg - BOA Duel TLSO Back Brace

- Provides full-circumferential rigid support from the T2/T3 scapular region to the sacrococcygeal junction
- Rigid anterior and posterior panels, a telescoping sternal aluminum Y-bar, and dual lacer compression pads
- Midline opening in posterior panel eases pressure over the incision site, allowing for wound inspection without removing the orthosis
- Latex free and heat moldable panels

**Indications:** Lumbar disc injury; Osteoporosis; Disc herniation and degeneration; Postoperative discectomy; IDET procedure; Spondylolithesis; Postoperative fusion; Spinal stenosis; Compression fractures; Scoliosis

### Orthomerica - California® ECO™ - Extension Compression Orthosis

- California Compression abdominal component, made of cool, breathable mesh provides cinching mechanical advantage
- Detachable abdominal component can be used independently of remaining system to provide a functional lumbar spinal orthosis
- Padded shoulder straps loosen without completely unfastening in order to facilitate simple reapplication
- Contourable aluminum "spine" is lined with CoolFoam™ and extends from the thoracic area to the sacrococcygeal junction
- The height of the posterior aluminum spine on the standard model is 16<sup>1</sup>/<sub>2</sub>" and the tall model is 18<sup>1</sup>/<sub>2</sub>"
- The tall size is usually indicated for patients 5'9" and taller
- The anterior height is approximately 7"
- Available in Black

**Indications:** Thoracic compression fracture; Kyphosis; Early through late stages of osteoporosis; Strain in upper thoracic spine due to sustained positioning at keyboard or other repetitive tasks; Acute pain relieved by thoracic extension

### California® Lombar™ - Lightweight Osteoporosis Mobility Brace for Active Rehabilitation

- Streamlined, low-profile orthosis that promotes thoracic extension without interfering with normal activities
- "Aluminum spine" provides strength and stability while conforming intimately to the patient's body to provide stability and pain relief
- Apron front closes with hook and loop via dual pull tabs with finger pockets for easily controllable, adjustable compression
- Soft CoolFoam™ liner and patient-controlled thoracic extension straps

**Indications:** Thoracic pain/instability; Thoracic compression fractures; Early stages of Osteoporosis; Acute and chronic pain relieved by thoracic extension; Post-operative support; Kyphosis; Spinal stenosis

Size	Height	Product No.
Standard	up to 5'9"	3285
Tall	5'9"+	3286

### California® Soft Spinal System

- Strapping arrangement provides easy-to-adjust compression
- Pre-formed ABS (plastic) neutral or pendulous anterior insert panel, neutral (15°) or 0° posterior panels
- All components pre-drilled for retrofitting and interchangeability
- Hypoallergenic, breathable foam wicks away moisture from patient's skin for increased comfort

**Indications:** Spinal problems between L3 and S1; Effective for more superior spinal problems between T7 and L3 by adding an anterior, posterior or combined upper thoracic component

### Ossur Americas - Miami Lumbar® TLSO

- Designed for pain relief, the protection of injured ligaments or muscles and post-surgical immobilization
- TLSO attachment can be used for maximum immobilization, which stabilizes the spine up to T7
- As patient progresses through different levels of healing, you can step-down the TLSO to a standard LSO brace, or remove the ATE and add the optional axillary shoulder straps to the PTE

**Indications: Miami Lumbar Belt:** Spinal stenosis; Herniated discs and degenerative spinal pathologies; **With Added Rigid Panels:** Post-surgical stabilization; Stable, non-displaced spinal fractures; Spinal stenosis; Herniated discs; Degenerative spinal pathologies; Spondylolisthesis; Spondylolysis

Miami Lumbar TLSO  
(belt not included)

Description	Product No.
TLSO System with ATE & PTE	LMB-T01
PTE Only	LMB-T02

### RCAI - Model 460 TLSO and Model 1460 TLSO with Sternal Attachment

- Provide circumferential pressure to stabilize the spine
- Uses modular systems featuring thermoplastic Kydex® anterior and posterior panels, with polymer stays in lateral pockets
- Back panels have a surgical opening to relieve pressure at the incision site
- Breathable liners are made of a “wickable” material that keeps moisture away from the skin, promoting patient comfort and compliance

**Indications:** Lumbar fusion laminectomy; Compression fracture; Degenerative disc disease; Spondylolisthesis; Spinal stenosis; Osteoporosis

**Truform - 957 - Knight-Taylor TSLO with 21" Uprights**

- Provides anterior/posterior/lateral control in the thoracolumbar spine
- Fully padded rigid frame
- Tapered pelvic and thoracic bands, paraspinal and lateral uprights
- Corset type abdominal front with truss buckle fastening, side lace adjustment
- Each size available in 17", 19" or 21" posterior uprights

Size	Hip Circumference	Product No.

**Trulife - CAMP XXI Taylor Support**

- Limits lumbar and lower thoracic spin motion
- Provides mild hyperextension of the lumbosacral joint
- Height adjustable posterior uprights and padded shoulder straps

**Indications:** Disorders affecting the spine and requiring immobilization of flexoextension, rotation, and lateral inflexion in the middle and lower dorsal region of the spine and the entire lumbar region of the spine; Contained herniations; Burst fracture; Post fusion

## Becker Orthopedic - B.O.S.S. TLSO with Articulating Pelvic Section

- Adjustable lateral uprights with serrated discs for easy angular adjustments
- Articulating, spring loaded, pelvic section
- Flexible back pad for added patient comfort
- Swivel Sternal pad
- NOTE: The superior border of the sternal pad should be located  $\frac{1}{2}$ " below the sternal notch; the inferior border of the suprapubic pad should be  $\frac{1}{2}$ " superior to the symphysis pubis

### Hyperextension TLSO with Swivel Sternal Pad and Quick Release Closure

- Consists of an anterior thoracic and pelvic assembly, each of which is attached to serrated discs on the superior and inferior margins of the lateral uprights
- Lateral uprights are padded and adjustable in length
- Posterior thoracolumbar pad is attached to the lateral uprights by Quick Release closure system

Bracing

### Dynamic Extension Orthosis

- Utilizes a three-point pressure system to dynamically reduce kyphotic posture and the pain often associated with compression fractures
- Dynamic extension is achieved by pulling on distal straps
- Adjustable lateral uprights have proximal serrations to ensure ease of adjustment and a precise fit
- The superior border of the sternal pad should be located 1/2" below the sternal notch. The inferior border of the suprapubic pad should be 1/2" superior to the symphysis pubis

### Bell-Horn - AquaFlex Hyperextension Brace

- Pivoting hinge means the self-adjusting spring loaded pelvic bar moves to help comfort the patient while sitting or standing
- Lightweight yet strong, the material adds to the comfort and strength of the brace
- Contoured aluminum frame comes with a cushioned posterior pad
- Thoracolumbar pad can be oriented either horizontally or vertically and a unique spring-controlled "floating" pelvic band continually adjusting as the patient changes from a standing to a sitting position, without compromising brace function

* Height measured from 2" below Sternal Notch to 2" above Symphysis Pubis					
** Chest measured at Axilla level					

### Closure Type

- SHL** = Single Lumbar Strap Hook-and-Loop
- DHL** = Double Lumbar Strap Hook-and-Loop
- MWG** = Metal Worm Gear Closure
- PWG** = Plastic Worm Gear Closure
- RCT** = Ratchet Closure

**Hope Orthopedic - ACE™ Brace (Pectoral Hook and Loop Pads)**

- Pectoral pads on sponge rubber disc with hook and loop fastener
- Hinged pubic assembly
- One size fits all back strap with pad
- Provides sternal pressure relief with no throat impingement

**Indications:** Flexible thoracic kyphosis; Stable compression fractures (T7-L2); Osteoporosis

Product No. **ACE-PV**

**ACE™ Brace (Sternal Pad)**

- Hinged sternal assembly
- Hinged pubic assembly
- One size fits all back strap with pad
- Most economical brace

**Indications:** Flexible thoracic kyphosis; Stable compression fractures (T7-L2); Osteoporosis

Product No. **ACE-ST**

**ACE™ Brace (300 Hyperextension)**

- Hinged sternal pad and pubic assembly
- Soft Volara foam padding
- Aluminum plates for rapid, precise fit
- One size fits all back strap

**Indications:** Flexible thoracic kyphosis; Stable compression fractures (T7-L2); Osteoporosis

Product No. **ACE-300**

**ACE™ Brace (Pectoral Silicone Pads)**

- Pectoral pads with adjustable silicone swivels
- Hinged pubic assembly
- Universal back strap and pad; front closure
- One size fits all back strap

**Indications:** Geriatric osteoporotic patient with prominent bony sternum, where orthotist desires pectoral pads to remain exactly as fitted

Product No. **ACE-PS**

Hyperextension  
Bracing

## Orthomerica - California® C.E.O.™ (Cruciform Extension Orthosis)

- Designed to extend the thoracic spine, prevent forward flexion, and limit rotation
- Compound closure system of this hyperextension orthosis provides excellent low back support, additional comfort and adjustable relief
- Two anterior thoracic extension (ATE) options - hinged swivel sternal pad or standard sternal relief design

**Indications:** Stable compression fractures between T-7 and L-2; Patients with flexible thoracic kyphosis; Need for thoracic extension to correct flexed posture; Thoracic instability and fractures accompanied by low back pain; Need for extension or hyperextension to promote spinal alignment and reduce pain

## RCAI - Hyperextension Orthosis

- Extends the throacic spine, preventing forward flexion and limits rotation
- Single screw height adjustment and heat moldable Kydex® thoracic and pubic areas, offering easy adjustment and patient customization
- Anterior thoracic and pubic areas are covered in anti-microbial foam liners that "wick" moisture away from the skin, keeping the patient dry and comfortable
- Flexible ethylene posterior panel with foam liner is supplied for increased stabilization and pain reduction

**Indications:** Stable thoracic and lumbar vertical compression fractures; Reduction of Kyphosis in patients with osteoporosis; To correct flexed posture accompanied by pain

Short	14"-19"	<b>455-HEO-Sx</b>
Average	17"-22"	<b>455-HEO-Av</b>

Measure from pubic symphysis to sternal notch; Fits up to size 52" waist

## Truform - 950 - Hyperextension Orthosis

- Provides anterior control in the thoracolumbar spine; indicated for compression fractures and post-fusion
- Sternal pad on swivel base, with fixed supra-pubic and lateral pads
- Thoracolumbar pad with polyethylene flanges
- Adjustable posterior straps which incorporate positive screw-lock fastening mechanism

**Indications:** Compression fractures; Post-fusion
