Foot Casting Blocks

- Made of Durr-Plex
- Assists in matching plantar surface of orthosis to the shoe interface
- Inter-nesting for storage

Description	Product No.
Set of three, 1 of each size	220251
Small, 3/16" heel-sole differential	220244
Medium, 5/16" heel-sole differential	220236
Large, 7/8" heel-sole differential	220228

Cling Film

- Premium quality; .003" thickness
- 12" x 2000' in cutter box for easy tear off at desired length

Product No. 7202BW

Isolation Rubber (not pictured)

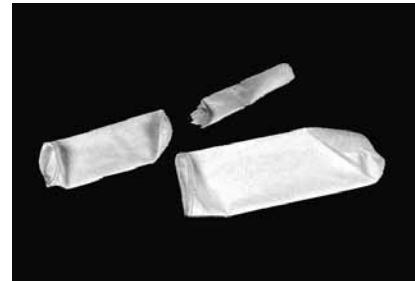

- Allows fabrication of socket to begin while plaster is wet
- Used for making plaster casts of unhealed residual limbs
- 10 per pack

Size	Size	Product No.
Medium	85 x 280 mm	615100300
Large	110 x 310 mm	615100200

Note: A PVA bag should be used over the isolation rubber after it is placed over the cast

Latex Casting Balloons

Size	Quantity	Size	Product No.
Small	10 per pack	8" x 2"	199092
Medium	25 per pack	3" x 8"	199084
Large	25 per pack	10" x 4"	199076

Latex Cone Casting Balloons

Size	Size	Product No.
Small	7" x 20"	940625
Medium	9 x 21"	940626
Large	12 x 22"	940627

3M Medical - Scotchcast™ Soft Cast Casting Tape

- Fiberglass casting tape; does not set to a completely rigid state
- Remains flexible and soft even when completely cured

Description	Color	Rolls/Box	Product No.
2" x 4 yds	White	10	82102
3" x 4 yds	White	10	82103
3" x 4 yds	Blue	10	82103B

4" x 4 yds	White	10	82104
5" x 4 yds	White	10	82105

Scotchcast™ Plus Soft Cast Casting Tape

- Combines the benefits of synthetic tape with the handling ease of plaster
- Knitted fiberglass construction and the patented slippery resin ensures superb conformability, molding and lamination
- Durable and lightweight
- Available in White

Description	Rolls/Box	Product No.
2" x 4 yds	10	82002
3" x 4 yds	10	82003
4" x 4 yds	10	82004
5" x 4 yds	10	82005

Synthetic Cast Padding

- Non-woven polyester padding that is porous, highly conformable, strong, yet easy to tear
- Suitable for use with all casting materials, plaster, and synthetic
- Sold in box quantity — 4 bags per box/80 rolls per box

Description	Color	Rolls/Bag	Product No.
2" x 4 yds	White	20	CMW02
3" x 4 yds	White	20	CMW03
4" x 4 yds	White	20	CMW04

BSN Medical - Orthoflex® Elastic Plaster of Paris Bandages

- Elastic gauze allows excellent conformability for difficult contours and bony prominences without creating distortions due to inner surface ridges
- Set Time: Extra-Fast (2-4 minutes)
- 12 rolls per box
- Contains latex rubber

Description	Case Qty	Product No.
4" x 4 yds	6 boxes/case	7324
5" x 4 yds	4 boxes/case	7325

Specialist® Plaster of Paris Bandages and Splints

- Uniformly coated and firmly adhered to the gauze
- High dry/wet plaster retention; plaster is applied to the cast and not wasted in the wrapper or dip bucket
- Two time settings: Extra-Fast, 2-4 minutes; Fast, 5-8 minutes
- Latex free

Description	Plaster Bandage Case Qty	Green Label X-Fast	Blue Label Fast

Gypsona S Plaster Elastic Bandage

- Improved elastic offers excellent molding characteristics
- Creamy texture for intimate moldability
- Set time: 5-8 minutes; 12 rolls per box
- Latex free

Description	Product No.
4" x 4 yds	30-7324
5" x 4 yds	30-7325

Gypsona HP Plaster of Paris Bandages

- Traditional rich and creamy texture allows intimate molding and creates a smooth, appealing finished cast
- Interlocking leno weave greatly enhances stability
- Set time: 2-4 minutes; 12 rolls per box
- Latex free

Description	Product No.
4" x 5 yds	30-3045
6" x 5 yds	30-3046

Gypsona Endless Slab Dispenser Pack

- 5 ply dispenser containing creamy, extra-fast plaster which enables improved detailed impressions and a faster set up time
- Technique used allows for faster application and a shorter casting time; ideal for body jackets
- Latex free

Description	Product No.
4" x 65'	87004913
8" x 65'	87004916

Delta-Lite® Conformable Fiberglass Cast Tape

- Prevents folds or creases when casting around body contours
- Provides unsurpassed conformability
- Finished casts are lightweight, strong, and resist breakdown
- Intended for rigid primary and secondary casting applications where conformability and patient fit is critical
- Set time: 3-5 minutes; 10 rolls per box
- Latex free

Description	Product No.
2" x 4 yds	6822A
3" x 4 yds	6823A
4" x 4 yds	6824A
5" x 4 yds	6825A

Delta-Rol® Synthetic Cast Padding

- Cool and comfortable non-absorbent material designed to wick moisture away and dry quickly
- Conformable stretch allows narrow widths around small anatomies without cutting and tearing
- Latex free

Description	Case Qty	Product No.
2" x 4 yds	24 rolls/bag, 3 bags/case	6882
3" x 4 yds	12 rolls/bag, 3 bags/case	6883

MCC-Compcore™

- Carbon reinforcement that laminates to polypropylene
- Provides approximately 50% increase in rigidity
- Sheet Size: 12" x 12"
- Available in two sizes and two thicknesses

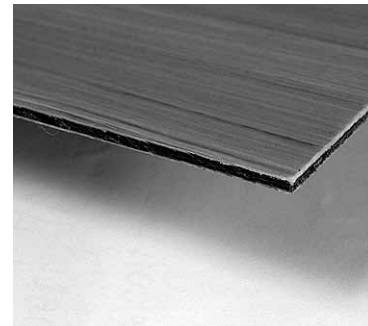

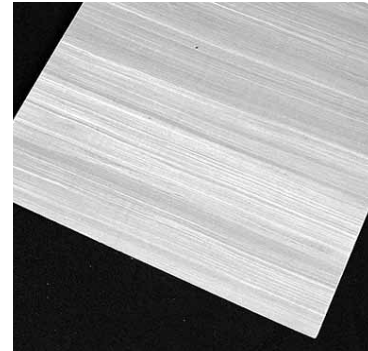

Description	Product No.
1½ mil (0.06")	MCC-412
2½ mil (0.09")	MCC-415

Fillauer - PolyCar-C®

- Available in two composite types: Bidirectional, for normal reinforcement, and Unidirectional, for stiffening or strengthening
- Easy to mold – it forms to extreme contours and has polypropylene matrix
- Thermo bonds to polypropylene, co-polymer and metal
- Adherence at 400° F

Description	Product No.

- Mix, shape and set in less than 5 minutes
- Hardener included

Description	Product No.
100 g	8000
250 g	8001

Silicone Foam Elastomer (A-106)

- Liquid silicone polymer; yields a low density silicone foam frequently used for custom BK distal end pads
- Mixing: 100 grams of base (A-2370) to 6 grams of Catalyst. Foaming will begin almost immediately upon addition of the catalyst and will continue for approximately three minutes. The foam can be handled within about 10 minutes after pouring; however, allow 24 hours for optimum physical properties. Confining the foam will result in a higher density
- Mixing with 6382: 6382 Elastomer can be added to make a higher density, more durable foam. Try a small test: 50 parts A-2370 and 50 parts 6382 to 6 parts of Catalyst, adjust the ratio to find your desired density
- Sold per pound (1 pint) with Catalyst

Product No. **A2370**

Silicone Elastomer (A-101)

- Two-part silicone which will react at room temperature without putting off heat. This material is dimensionally stable and does not become hard with age. It is commonly used as a resin for laminating silicone partial feet and bladders for expandable wall syemes. It is also added to A2370 elastomer foam to increase the density
- Mixing: 100 grams of base (6382) to 21 drops of catalyst. This mix will give you an approximate work time of 10 minutes and a cure time of 30 minutes. The viscosity of 6382 is comparable to honey. When used as a laminate the viscosity must be changed to make it pourable. This can be accomplished with the addition of OH Thinner (part no. A318)
- Mixing for Lamination: 100 grams of base, 50 grams of OH Thinner and 42 drops of catalyst. This mix will give you an approximate work time of 10 minutes and a cure time of 30 minutes. The amount of OH thinner can be changed to find the viscosity that works for you, but do not add more than 65 to 100 g of base etc.; this could cause the lamination to be weak
- Sold per pound (1 pint) with Catalyst

Product No. **6382**

OH Elastomer Thinner

- Used as a thinner for 6382 Elastomer

Product No. **A318**

Silicone Elastomer Catalyst Only

- Used with A2370 or 6382 Elastomer; 1 ounce jar

Product No. **A-106C**

Apex - Plastazote Sheets (not pictured)

- A foamed polyethylene of closed cell construction, cross-linked to ensure extreme lightness and improve resistance
- Flammability is of a low order - it melts and burns slowly
- Unaffected by all common acids, alkalis and solvents
- Medium density recommended for non-weight-bearing linings & pads
- Firm density recommended for collars and spinal jackets
- Rigid density recommended for foot orthoses and splints
- Non-perforated
- Molding Temperature: 285°F

AliMed - NickelPlast™

- High strength expanded material with outstanding uniformity and superior working characteristics
- Resists bottoming out and offers a resilient and rubbery quality not found in simpler, cross-linked polyethylene materials
- Shrinks about 15% when thoroughly heated
- Nickelplast S gives extra resilience and elongation and has a more rubbery feel

Description	Color	Thickness	Sheet Size	Product No.

Ultra Cloud Crepe

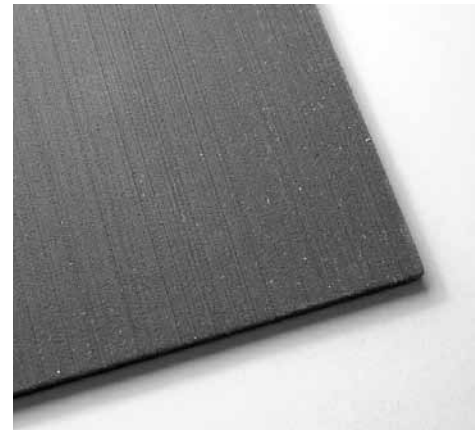

- A unique soft, lightweight thermomoldable EVA that provides long lasting shock absorbing protection
- Can be used against the skin as a top cover or padding
- 17-20 Durometer
- Sheet Size: 18" x 36"

Color	<u>Product No.</u>				
	1/8" (6 Iron)	3/16" (9 Iron)	1/4" (12 Iron)	3/8" (18 Iron)	1/2" (24 Iron)

Vulcrepe

- SBR Rubber which provides good abrasion for outsole use
- Fine Rib (6 Iron) is used when greater flexibility is needed
- Wide Rib (7 Iron) is more suitable for applications where a thicker sole is necessary
- Sheet Size: 18" x 36"

Description	Product No.	
	Brown	Black
Wide Rib	9107201800	9107101800
Fine Rib	—	9306101800

Gum Crinkle

- Known as Luna Crepe
- Synthetic gum rubber with crinkle pattern
- Higher degree of anti-slip quality than SBR rubber compounds
- Available in Black

Description	Sheet Size	Product No.
7 Iron	15" x 30"	8907101500
12 Iron	15" x 30"	8912101500

Firm Crepe

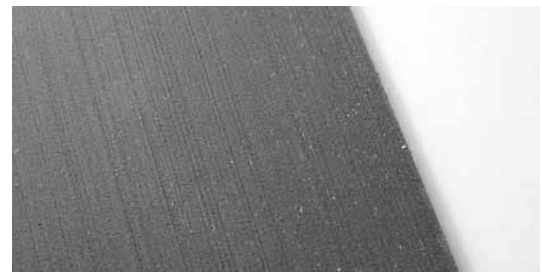

- A firmer EVA/SBR blend
- Durable and abrasive-resistant enough to be used for outsoiling
- 60-65 Durometer
- Molding Temperature: 275° F

Color	Product No.			
	1/8" (6 Iron)	1/4" (12 Iron)	3/8" (18 Iron)	1/2" (24 Iron)

Acor - Tan Multicork

- Combination of cork and eva that is both lightweight and firm
- Heat moldable, grindable and washable
- Makes a great base for foot orthotics where substantial control is required

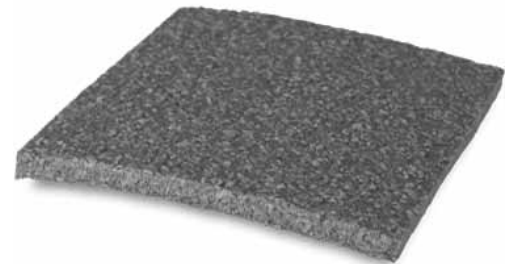

Thickness	Sheet Size	Product No.
1/8"	36" x 30"	SDUR-00054
1/4"	36" x 30"	SDUR-00077
1/2"	36" x 30"	SDUR-00078

Apex - Thermocork®

- Heat formable; combines both strength and flexibility
- Offers shock absorption, while maintaining its shape under severe stress
- Can be easily formed directly to a positive model
- Molding Temperature: 300° F

Thickness	Sheet Size	Product No.
1/8"	35" x 43"	8013112
3/16"	35" x 43"	8013113
1/4"	35" x 43"	8013114
3/8"	24" x 44"	8013115

Thermocork Lite

- Lightweight thermoplastic blend that combines cork with polyolephin foam for greater flexibility and cushioning
- Unique composite makes Thermocork Lite very easy to mold and grind; will maintain shape and context under stress
- Molding temperature: 275° F

Thickness	Sheet Size	Product No.	
		55 Durometer	65 Durometer
1/8"	32" x 36"	8014-2	33" x 38" 8015-2

AliMed - AliCork™ Lite

- Moldable material; Holds shape, absorbs shock and impact
- A dispersion of natural cork particles in a unique plastic matrix
- May be compressed to relieve point pressure by applying local heat with a heat gun
- Shore A Durometer 65

Thickness	Sheet Size	Product No.
1/4"	33" x 26"	4003ALI
3/8"	33" x 26"	4004ALI

Birkenstock - Birko-Cork (not pictured)

- Firm density
- 10 mm thick
- Sheet Size: 18" x 12"

Product No. **13310**

UCO International - UCOkork®

- Semi-rigid, elastic blend of copolymer foam and cork
- Molds and sands well

Thickness	Sheet Size	Product No.
4 mm	32" x 38"	32/0027-704
5 mm	32" x 38"	32/0027-705

10 mm	32" x 38"	32/0027-710
12 mm	32" x 38"	32/0027-712

Acor - QuikForm®

- Impregnated fiber resin
- Self-adherent for some applications; can be glued if needed
- Thin, flexible, and easily heat molded or vacuum formed; Grindable
- Molding Temperature: 250° - 275° F for 1-1½ min.
- Available in White

Thickness	Sheet Size	Product No.
1.6 mm	40" x 20"	SDUR-00064

QuikForm Firm

- Has the characteristics of thermoplastic
- Fabric cover allows the use of adhesives for a secure bond
- Thin and flexible, yet firm; easily heat molded or vacuum formed
- Grindable
- Molding Temperature: 350° F for 2-3 min.
- Available in White

Thickness	Sheet Size	Product No.
1.6 mm	36" x 18"	SDUR-00251

X-Static® Lined Materials

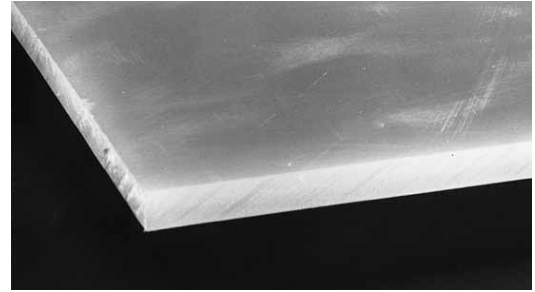

- X-Static uses pure silver to kill bacteria and fungi; destroys odor and regulates temperature through heat transfer
- X-Static Available in Black

Description	Sheet Size	Product No.
X-Static + 1/16" 1-Side Abraded Blue Poron	27" x 36"	XSPORS-00003

Cope Plastics - Copolymer

- Translucent white polypropylene with 5-10% polyethylene added
- Not as brittle as polypropylene
- Turns transparent at working temperature
- Suggested for almost all orthotic applications and prosthetic sockets
- Forming temperature: 350° F
- May also be available in Light Blue, Light Pink, Red, Neon Green, and Neon Pink
