### Sock Measurement Instructions

- To provide a proper fitting prosthetic sock for your patient, it is important that a correct measurement be made
- There are three basic measurements that are necessary for a proper fitting prosthetic sock:
  - length
  - top width
  - toe width

#### A - B Measurement (top width)

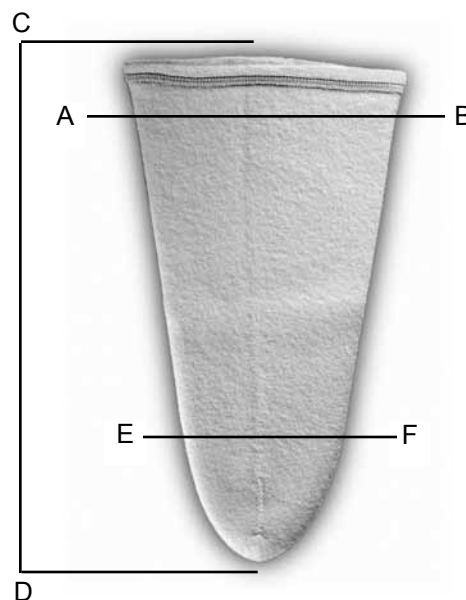

- Should be taken from top left corner of sock lying flat to top right corner and correspond to  $\frac{1}{2}$  the circumference measurement at the point where the top of the sock should be on the leg or arm

#### C - D Measurement (length)

- Should be taken from top of sock lying flat to bottom of toe and should correspond to the length from distal to where top of sock should be on the leg or arm

#### E - F Measurement (toe width)

- Should be taken from left side of sock lying flat, perpendicular to toe fashioning, to right side of sock and should correspond to  $\frac{1}{2}$  the circumference 2" up from the distal end of the limb

*Seam of sock is exaggerated for this illustration*

Note: Remember – a proper measurement means a correct fitting prosthetic sock for your patient.

### Guidelines for Sizing and Measuring Custom Socks

#### Prosthetic Sock Sizes

Nearly 90% of the amputees who use socks can be correctly fitted with a stock size sock because the knitted construction has a stretch which allows a fitting range. Most prosthetists can judge the needed size by working with the limb and the cast. Nevertheless, some measurement guidelines can be helpful. First, measure the limb circumference at the top of the socket; second, measure the toe limb circumference two (2) inches from the distal end; third, measure from the distal end to the top of the socket. The length of the sock should be 2 to 4 inches more than this measurement depending on the type of fitting and suspension preference, the fabric (Wool and A Plus will shrink more than cotton) and the amount of tautness the patient is likely to achieve in donning.

Socks are sized in flat measurements; i.e., half the circumference measurement (less 5% to give a snug fit) for top and toe – then matching those figures to the closest comparable size measurements in all the charts – see previous page. Custom socks need to be ordered only when patient's measurements do not correspond with any of the coded stock sizes or when a sock needs an addition or adjustment, i.e., split for hip joint, suspension system hole, elastic at waist or leg, fly, etc.

#### Hip Joint/Pelvic Belt Prosthetic Socks

An order for socks with a split for hip joint should state the size of the sock and whether or not a tie or just the edges split is desired. Slits are three (3) inches deep unless otherwise specified.

#### Ischial Containment/High Lateral Brim

To eliminate excessive rollover, medial cuts for sockets with high lateral wall can be made when requested. Specify the depth of the cut desired.

Continued on next page

## Guidelines for Sizing and Measuring Custom Socks - Continued

### ***Irregular Shapes***

For prosthetic socks which are not evenly graduated from the top to the toe, take circumference measurements at the irregular points, lengths from the distal end to each of those points and determine total length. Sending a drawing is very helpful. State fabric and ply choice.

### ***Fitting Socks and Re-Orders***

Please state customer's name on all orders for custom socks. A "fitting" sock will normally be sent. It is suggested that only one sock be ordered until the right size and material can be established, then the quality can be specified. Records for each customer are kept and reorders can duplicate the original or alterations can be made, as needed, usually without another pattern.

#### ***1. Symes and Chopart***

Socks have a bulbous end. Standard sizes available. If custom size is needed, prepare a profile drawing of the limb, giving circumference measurements at the top, ankle, and ball. Note on drawing if limb is symmetrical or asymmetrical. If asymmetrical, record a circumference measurement of the partial foot extension.

#### ***2. Knee Disarticulation (box toe)***

State the length desired, the top circumference at the perineum and the toe circumference one (1) inch from the end of the limb. Specify box toe.

#### ***3. Large Knee and Thigh***

Send a drawing of the limb, front to back view. Specify length of sock with allowance for turn down. State length from the end to the beginning of the bulge below the knee and from the end of the largest part of the knee. State circumferences at top, knee, below condyles and two (2) inches from the end of the limb.

#### ***4. Flexed Knee***

Prepare a profile drawing. Specify the length of the sock. Specify circumference at top, above knee, around knee, and at the end of the limb. If flexion angle is desired, please specify.

#### ***5. Tailoring***

When socks need to be very irregular, an outline pattern with measurements every two inches can be sent or an exact pattern can be duplicated. A single flat seam will be used in construction with all the edges being finished. Tailoring of the knitted material can produce socks that are impossible to fashion on the knitting machines, especially when rounding is desired. If knitted socks or tailored socks are preferred, specify by using the "K" or "T" code.

#### ***6. Above Elbow Arm Socks***

Prepare a drawing of the front view. Note the total length and the length from the axilla to the distal end of the limb. Take circumference measurements one (1) inch from the distal end and at the axilla. Specify a flat measurement from the upper arm to the point on the chest where the sock should come.

#### ***7. Hip Disarticulation and Hemi-Pelvectomy***

Prepare a drawing as illustrated. Specify length from groin to waist. Hip disarticulation socks are made four (4) inches longer than this measurement to allow turnover, unless otherwise specified. Give circumference measurements for waist, hips and sound leg (take at angle). If fly or colostomy hole is desired, specify which leg has been amputated. Hip socks are also made with leg extensions and/or elastic at the waist and leg.

WHEN ORDERING please provide the following information for special and irregular prosthetic socks

- |                    |                          |
|--------------------|--------------------------|
| 1. Patient's name  | 5. Toe width, flat       |
| 2. Quantity        | 6. Material and weight   |
| 3. Length          | 7. Shipping instructions |
| 4. Top width, flat |                          |

Irregular or special size: send complete information and sketch of stump, including length and circumference measurements.

**Comfort Products - Regal Acrylic Prosthetic Sock**

- Made of Acrylic and Lycra®
- Soft stretchable sock providing the patient with the latest advancement in fiber technology and knitting methods
- With the combination of fibers it gives a degree of stretch and conformance for the residual limb not possible with other fibers while wicking away moisture to ensure greater comfort
- Can be machine washed and dried in the dryer on delicate cycles
- Band color indicates ply: 2=beige, 3=yellow, 4=pink, 5=green, 6=gray, 7=gold
- Replace ? with ply
- Add 3 to the end of product number for sock with distal hole

**Regal™ Acrylic Sock (3, 5 and 6 Ply are Standard – 2, 4 and 7 Ply are Special Order)**

### Comfort AG Sock

- High performance alternative to the Regal sock
- CoolMax fibers plaited with X-Static silver
- Available in Standard 3, 5 and 6 ply, Special Order 2, 4, and 7 ply
- Antimicrobial protection
- Wicks moisture away from skin
- Replace ? with Ply
- Add 3 to the end of product number for sock with distal hole

Prosthetic  
Socks

**Ply-Two™ Super Soft Sock**

- Constructed of Acrylic and Lycra for strength and durability, while remaining soft and supple
- Nylon reinforced rounded toe eliminates the distal end pocket of conventional prosthetic socks
- Non-allergenic and double-fleeced
- Flat seamed top with a special non-ravel interlocked stitch
- Add 3 to the end of product number for a vulcanized 3S hole; add 3K to the end of product number for a knitted 3S hole (a vulcanized hole will be included unless a knitted hole is requested)

### SoftWick Stretch Prosthetic Half Sock

- The ideal solution for managing distal volume changes with a liner
- Distal hole is knit into the sock to ensure a proper fit without unraveling
- CoolMax® and Lycra construction stretches to accommodate a multitude of shapes
- Four sizes ensures a proper fit for almost any application
- The color band knit into each sock allows easy size identification

Prosthetic  
Socks

**Bio-Wick™ One Ply Sock**

- Microsafe® Anti-Microbial provides continuous protection against odor-causing bacteria
- CoolMax transports moisture away from skin, keeping interior dryer and more comfortable
- Completely seamless; no stitching in toe area
- Exceptional stretch conforms to virtually any shape including Symes
- Made of 45% Cotton, 45% CoolMax®, 8% Acetate, and 2% Lycra
- Non-run construction allows for cutting to length if necessary
- Available with a vulcanized 3S hole

**Knit-Rite - Dero® Hole-In-Toe Prosthetic Sock**

- Rotation control prosthetic sock, for use with roll-on suction suspension liners
- Minimizes or eliminates unwanted rotation and vertical movement between the outer socket and silicone suspension liner, gel interface or silicone insert
- Incorporates friction enhancing polymer strips into the prosthetic sock to restrict movement
- Provides silicone suction suspension in transfemoral cases where it may be contraindicated by allowing easier donning and volume management capability
- Polymer strips add virtually no thickness and are vertically oriented in standard A/K and B/K patterns to allow ply combinations, while maintaining the circumferential stretch inherent in the Soft-Sock

Black	<b>84707</b>

**A-Plus™ (Acrylic/Lycra) Sock**

- The prosthetic sock made with Acrylic Plus Lycra Spandex for a garment featuring softness plus stretch, moisture wicking plus conforming and easy care plus long-wear
- Available in 2, 3, and 4 ply
- Because the Acrylic/Lycra Spandex yarn snugs the knit close together, a 2 ply (green stitching) approximates the thickness of a 3 ply wool sock; 3 ply (blue stitching) approximates 5 ply wool and the 4 ply (red stitching) approximates 6 ply wool
- All A-Plus socks will measure up to 10% less in width so that the size of the A-Plus sock is the same size that patient would wear in a wool sock\*
- The length measurement is stretched in fleecing and will relax to stated measurement when washed
- Available in Lengths of 8"-24" in 2" increments
- Replace ? with Ply and Replace ?? with Length

**A-Plus Standard Socks**

Size	Length	Toe Width	Top Width	Product No.

\*Note: Due to the stretch of A-Plus Socks, widths are up to 10% less.

### A-Plus Hole-In-Toe Sock

- Made with a distal hole specifically for use with pin suspension systems
- The knit construction adds little or no additional distal thickness and eliminates the need for cutting the sock which helps prevent raveling
- The range of thicknesses allows precise fit adjustments with all pin systems
- Available in 2, 3, and 4 ply
- Available in Lengths of 8"-24" in 2" increments
- Replace ? with Ply and Replace ?? with Length

**X-WOOL™ Prosthetic Sock**

- Virgin Wool - plaited inside with X-Static/Lycra corespun yarn, Lycra allows garment to contour without stretching out, accommodates flexion and allows fewer sizes
- Absorbent virgin wool is thick and cushioning
- Silver is naturally antimicrobial, enabling X-Static to safely inhibit the growth of odor causing bacteria and fungi
- Fleeced to add softness; machine washable - resists shrinkage
- Available in 3, 5 and 6 ply

Gel Socks

**ALPS - Skin Reliever**

- Skin reliever eliminates shear forces, friction, and prevents abrasions on the skin of the stump
- Replaces pelite and socks
- Reduces shearing and abrasions; softens and soothes skin
- Tapered from 3 mm - 1.5 mm
- Warranty: 1 month

Size	Product No.
10-19 cm	<b>ENCP-16-3</b>
20-27 cm	<b>ENCP-20-3</b>
28-31 cm	<b>ENCP-28-3</b>
Measurements taken 6 cm from the distal end	

**Comfort Products - Comfort Sheath**

- Toe: reinforced for greater wear resistance
- Body: unique open mesh design which stretches to conform to shape while allowing for needed ventilation
- Top: turned welt construction providing added strength where needed
- Add to 3 to end of product number for sock with distal hole

### Knit-Rite - Silver Sheath

- Sheaths control friction, adjust thickness, provide strength and aid skin care
- Knit-Rite Sheaths have transfers on both sheaths of the pair to help patients position the sheath to maximize comfort
- The Silver Sheath with X-Static® is anti-odor, it also wicks moisture away from the skin and aids in thermal consistency
- PROPER CARE: Sheaths may be hand or machine washed, use soap or mild detergent in warm water. (NO BLEACH.) Rinse thoroughly, air dry overnight or tumble dry low
- Sold by the Box (3 pair/box)

Description	Fits Sizes	Length	Product No.

Wide Short	#3 and above	10"-14"	<b>2HPXWDSH</b>

### Hole in Toe Prosthetic Sheath

- Sheaths control friction, adjust thickness and aid skin care
- Can be worn with prosthetic socks or alone
- 100% stretch nylon
- The qualities of stretch nylon enable fitting of somewhat greater widths or lengths
- Have transfers on both sheaths of the pair to help patients position sheath to give greatest comfort
- Sold by the Box (3 pair/box)
- Available colors: White and Dusk

Sock Size	Fits Sizes	Length	Product No.

### Super Stretch Sheath

- Super Stretch Sheaths have Lycra added to the nylon to accommodate an even greater range and more conforming fit, enhance flexion, movement and improve suspension
- The surface texture provides improved suspension
- Sold by the Box (3 pair/box)

Sock Size	Fits Sizes	Length	Product No.

Sheaths

**Prosthetic Sheath**

- Sheaths control friction and aid skin care
- Can be worn with prosthetic socks or alone
- 4 widths: child, narrow, regular, and wide-sheath corresponds to prosthetic sock sizes
- The qualities of stretch nylon enable fitting of somewhat greater widths or lengths
- Have transfers on both sheaths of the pair to help patients position sheath to give greatest comfort
- 100% stretch nylon; Machine wash/dry
- Sold by the Box (3 pair/box)
- Available colors: White and Dusk

### Silipos - Silosheath Original

- 2 ply, 2 mm gel
- Minimizes skin breakdown
- Reduces friction, shearing and abrasion on residual limb
- Cushions and protects
- Softens, soothes and improves the appearance of skin
- Product is washable and reusable

### Double Cushion Silosheath™

- 2 ply, 3 mm gel, extra gel at distal end
- Minimizes skin breakdown
- Reduces friction, shearing and abrasion on residual limb
- Cushions and protects
- Softens, soothes and improves the appearance of skin
- Product is washable and reusable

### Silosheath Extra Life™

- 3 ply, 2 mm gel, increased durability
- Minimizes skin breakdown
- Reduces friction, shearing and abrasion on residual limb
- Cushions and protects
- Softens, soothes and improves the appearance of skin
- Product is washable and reusable

### Juzo - Dynamic (Varin) Soft-In Shrinker

- Soft, smooth fabric for sensitive skin
- Maintains shape of stump
- Stay-put band has silicone border
- Flat, non-irritating distal seam
- Available in BK, AK with hip attachment and AK with body part
- To Order, refer to Sizing Charts on next page:
  - Amputation Level: CF (BK); FG (AK)
  - Lengths available: Small (S), Medium (M) or Large (L); refer to chart below for sizing parameters
  - Hip Attachment options: HA to include attachment or leave blank to omit
  - Circumference sizes: I, II, III, IV, V or VI per sizing chart on next page

Shrinkers

### Knit-Rite - Compressogrip Elastic Shrinkers

- Tubular elastic compression material for control or prevention of edema following amputation surgery
- Speeds fabrication, fitting and delivery of a prosthesis by uncomplcating application of an elastic bandage
- Approximate single layer pressure at 50% stretch is 20-25 mmHg
- Doubled layers will double compression at both 50% and 100% stretch
- Applications of more than two layers should be monitored as compression may exceed limits of desired therapeutic pressure
- 92% polyester, 8% spandex; latex free; washable

APPLY THE FIRST LAYER

POSITION THE RING SNUGLY

APPLY THE SECOND LAYER TO A POINT OF DESIRED MAXIMUM COMPRESSION.

### To Select Size

Match "Fits Circumference" to:

1. B/K circumference 2" below medial tibia tubercle
2. A/K circumference 2" from distal end
3. Allow for Swelling

### Nylon Bone Ring

- Use with compressogrip tubular compression stockinette
- Pack of 100

Bone Ring Size	Shrinker Size	Product No.
5/8"	2", 2 1/2"	5B705505
3/4"	2", 2 1/2"	5B705506
7/8"	3", 4"	5B705507
1"	5"	5B705510
1 1/8"	6"	5B705511

**Compressogrip B/K Shrinker with X-Static®**

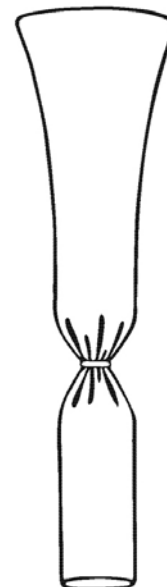

- X-static silver fiber inhibits bacteria for more hygienic post-op environment
- Patients report relief from phantom pain
- Compressogrip shrinkers are effective, easy to apply; practical and affordable to inventory for immediate delivery
- Color: Gray; latex free, washable

Flat Width	Top
4" (10.2 cm)	5" flat width; tapers last 4" of length
5" (12.7 cm)	6.5" flat width; tapers last 5" of length
6" (15.2 cm)	7.5" flat width; tapers last 6" of length

**To Select Size**

1. Match "Fits Circumference" to B/K circumference 2" below medial tibia tubercle
2. Compressogrip fabric gives 20-25 mm Hg compression at 50% stretch; at 100% stretch the compression is almost doubled
3. Double layers will almost double compression at both 50% and 100% stretch
4. Application of more than 2 layers may exceed the limits of desired therapeutic pressure

### B/K Shrinker

- Made from Rayon/Lycra core yarn
- Softer, more comfortable, easily donned and may be machine washed and dried, warm temp. no bleach
- Medium compression (gray top) exerts 25-30 mm Hg pressure at 50% stretch for tender stumps, nighttime wear and limb size measurement
- Heavy compression (green top) exerts 55-60 mm Hg pressure at 50% stretch for reduction of edema and shaping of limb
- Replace ?? with length 10", 12", 14"
- Double taper has different measurements
- Corespun yarn results in softer fabric, better fit and permits stretch over the circumference range

**AK Shrinker**

- Easy to adjust, hook-and-pile, elongated side opening waist band, adaptable for left or right amputation
- Optional auxiliary support for proximal edge at groin can be attached at any point on waist band or easily detached and removed (item 6W-7322-3)
- Tapered design for gradient pressure; heavy (60-65 mm Hg) or medium (30-35 mm Hg) pressure available
- Superior 3-dimensional support and shaping of distal end; garment length from groin to distal end should be one to two inches shorter than actual measurement so proper snugging of distal end will not result in roll at groin
- Replace ?? with length 7", 10", 13" (groin to distal)

### Compressogrip Tubular Elastic Bandage

- Edema reduction and control
- Casting compression and soft tissue control
- More consistent compression than elastic wrap
- Note: Single layer supportive compression (20-25 mm Hg), double layer provides therapeutic compression (35-50 mm Hg) at 50% stretch
- All sizes provided in 11 yard (10 meter) rolls
- 92% Polyester, 8% Spandex, Latex free
- Machine wash and dry, warm, no bleach
- Fabric will relax 20% in length after first washing, autoclaveable

Shrinkers

**Rx Textiles - Tensitube® Blue**

- A latex-free tubular elastic shrinker that helps reduce and control hypertrophic scarring and edema on residual limbs
- A ring eases application
- Shrinker packs are primarily used for post-op residual limb shrinker
- Easily applied and offers controlled compression which accelerates the prosthetic fit
- Perfect for casting and remains effective after repeated washings

**AK Stump Shrinker with Expansion Gusset**

- Single piece one-way stretch surgical elastic construction
- Universally adjustable elastic waistband with hook-and-pile fastening
- Slightly tapered expansion gusset, 4 1/2" wide by 3 1/4" deep, at the inner proximal edge where the stump meets the trunk of the body
- Gusset prevents irritation over the inner thigh near the groin area
- Lengths: 6", 8", 10", 12" and 14"
- Replace ?? with length

Size	Thigh Circ.	Product No.
Small	13-16"	<b>0837AK??-S</b>
