# HANGER SCORE UPDATE: SPINAL BRACING

## Update to Spinal Bracing Offering for Hanger Score

Hanger Clinic, in collaboration with Hanger Supply Chain, is pleased to announce the updated Hanger Score offering for Spinal Bracing. This selection was based upon a retrospective analysis of utilization, clinical efficacy, and a competitive sourcing process.

The Department of Clinical and Scientific Affairs assembled a panel of high volume Hanger clinical orthotists, considered subject matter experts in this area of practice, from across the country and every zone to assess and rate a broad range of spinal bracing currently available to the U.S. Market. These clinical ratings formed the foundation for the decision-making process.

Ultimately, the selected spinal bracing represents a composite consideration of clinical performance, historic utilization and pricing, which we feel will satisfy the clinical, service, and overall quality standards that are required to be a part of the Hanger Score program.
